Free for dev - list of software-2 SaaS, PaaS, IaaS, etc.

Keywords

URL	

Developers and Open Source authors now have a massive amount of services offering free tiers, but it can be hard to find them all to make informed decisions.

This is a list of software (SaaS, PaaS, IaaS, etc.) and other offerings that have free tiers for developers.

The scope of this particular list is limited to things that infrastructure developers (System Administrator, DevOps Practitioners, etc.) are likely to find useful. We love all the free services out there, but it would be good to keep it on topic. It's a bit of a grey line at times so this is a bit opinionated; do not be offended if I do not accept your contribution.

This list is the result of Pull Requests, reviews, ideas and work done by 900+ people. You too can help by sending Pull Requests to add more services or by remove ones whose offerings have changed or been retired.

NOTE: This list is only for as-a-Service offerings, not for self-hosted software. For a service to be eligible it has to offer a free tier and not just a free trial. If the free tier is time-bucketed it has to be for at least a year. We also consider the free tier from a security perspective, so SSO is fine but I will not accept services that restrict TLS to paid-only tiers.

Testing

- Applitools.com — Smart visual validation for web, native mobile and desktop apps. Integrates with almost all automation solutions (like Selenium and Karma) and remote runners (Sauce Labs, Browser Stack). free for open source. A free tier for a single user with limited checkpoints per week.
- Appetize — Test your Android & iOS apps on this Cloud Based Android Phone/Tablets emulators and iPhone/iPad simulators directly in your browser. Free tier includes 1 concurrent session with 100 minutes usage per month. No limit on app size.
- Bird Eats Bug — Report bugs faster (and better). Record your screen with Bird browser extension, it will auto-capture technical data that engineers need to debug. Free tier suitable for small teams.
- browserstack.com — Manual and automated browser testing, free for Open Source
- checkbot.io — Browser extension that tests if your website follows 50+ SEO, speed and security best practices. Free tier for smaller websites.
- crossbrowsertesting.com - Manual, Visual, and Selenium Browser Testing in the cloud - free for Open Source
- cypress.io - Fast, easy and reliable testing for anything that runs in a browser. Cypress Test Runner is always free and open source with no restrictions and limitations. Cypress Dashboard is free for open source projects for up to 5 users.
- everystep-automation.com — Records and replays all steps made in a web browser and creates scripts,... free with fewer options

- Gremlin — Gremlin's Chaos Engineering tools allow you to safely, securely, and simply inject failure into your systems to find weaknesses before they cause customer-facing issues. Gremlin Free provides access to Shutdown and CPU attacks on up to 5 hosts or containers.
- gridlastic.com — Selenium Grid testing with free plan up to 4 simultaneous selenium nodes/10 grid starts/4,000 test minutes/month
- loadmill.com - Automatically create API and load tests by analyzing network traffic. Simulate up to 50 concurrent users for up to 60 minutes for free every month.
- percy.io - Add visual testing to any web app, static site, style guide, or component library. Unlimited team members, Demo app and unlimited projects, 5,000 snapshots / month.
- reflect.run - Codeless automated tests for web apps. Tests can be scheduled in-app or executed from a CI/CD tool. Each test run includes a full video recording along with console and network logs. The free tier includes an unlimited number of saved tests, with 25 test runs per month and up to 3 users.
- saucelabs.com — Cross browser testing, Selenium testing and mobile testing, free for Open Source
- testingbot.com — Selenium Browser and Device Testing, free for Open Source
- tesults.com — Test results reporting and test case management. Integrates with popular test frameworks. Open Source software developers, individuals, educators, and small teams getting started can request discounted and free offerings beyond basic free project.
- websitepulse.com — Various free network and server tools.
- qase.io - Test management system for Dev and QA teams. Manage test cases, compose test runs, perform test runs, track defects and measure impact. The free tier includes all core features, with 500Mb available for attachments and up to 3 users.
- knapsackpro.com - Speed up your tests with optimal test suite parallelisation on any CI provider. Split Ruby, JavaScript tests on parallel CI nodes to save time. Free plan for up to 10 minutes test files and free unlimited plan for Open Source projects.
- webhook.site - Verify webhooks, outbound HTTP requests, or emails with a custom URL. Temporary URL and email address is always free.
- Vaadin — Build scalable UIs in Java or TypeScript, and use the integrated tooling, components and design system to iterate faster, design better and simplify the development process. Unlimited Projects with 5 years free maintenance.

Security and PKI

- alienvault.com — Uncovers compromised systems in your network
- atomist.com — A quicker and more convenient way to automate a variety of development tasks. Now in beta.
- auth0.com — Hosted free for development SSO. Up to 2 social identity providers for closed-source projects.
- Authress — Authentication login and access control, unlimited identity providers for any project. Facebook, Google, Twitter and more. First 1000 API calls are free.
- Authy - Two-factor authentication (2FA) on multiple devices, with backups. Drop-in replacement for Google Authenticator. Free for up to 100 successful authentications.
- bitninja.io — Botnet protection through a blacklist, free plan only reports limited information on each attack
- cloudsploit.com — Amazon Web Services (AWS) security and compliance auditing and monitoring
- Cmd — Security platform providing real-time access control and dynamic policy enforcement on every Linux instance in your cloud or datacenter
- CodeNotary.io — Open Source platform with indelible proof to notarize code, files, directories or container
- crypteron.com — Cloud-first, developer-friendly security platform prevents data breaches in .NET and Java applications

- Dependabot Automated dependency updates for Ruby, JavaScript, Python, PHP, Elixir, Rust, Java (Maven and Gradle), .NET, Go, Elm, Docker, Terraform, Git Submodules and GitHub Actions.
- DJ Checkup — Scan your Django site for security flaws with this free, automated, checkup tool. Forked from the Pony Checkup site.
- Doppler — Universal Secrets Manager for application secrets and config, with support for syncing to various cloud providers. Free for unlimited users with basic access controls.
- duo.com — Two-factor authentication (2FA) for website or app. Free for 10 users, all authentication methods, unlimited, integrations, hardware tokens.
- foxpass.com — Hosted LDAP and RADIUS. Easy per-user logins to servers, VPNs and wireless networks. Free for 10 users
- globalsign.com — Free SSL certificates for Open Source
- Have I been pwned? — REST API for fetching the information on the breaches.
- Internet.nl — Test for modern Internet Standards like IPv6, DNSSEC, HTTPS, DMARC, STARTTLS and DANE
- Jumpcloud — Provides directory as a service similar to Azure AD, user management, single sign-on, and RADIUS authentication. Free for up to 10 users.
- keychest.net - SSL expiry management and cert purchase with an integrated CT database
- letsencrypt.org — Free SSL Certificate Authority with certs trusted by all major browsers
- LoginRadius — Managed User Authentication service for free. Email registration and 3 social providers.
- logintc.com — Two-factor authentication (2FA) by push notifications, free for 10 users, VPN, Websites and SSH
- meterian.io - Monitor Java, Javascript, .NET, Scala, Ruby and NodeJS projects for security vulnerabilities in dependencies. Free for one private project, unlimited projects for open source.
- Mozilla Observatory — Find and fix security vulnerabilities in your site.
- Okta — User management, authentication and authorization. Free for up to 1000 monthly active users.
- onelogin.com — Identity as a Service (IDaaS), Single Sign-On Identity Provider, Cloud SSO IdP, 3 company apps and 5 personal apps, unlimited users
- Operous — Cloud instance testing tool with a comprehensive and automated set of test-suites of best practices, performance, and security. Free tier offers 100 testing minutes, 10 Test Suites, and up to 5 instances to 1 user.
- opswat.com — Security Monitoring of computers, devices, applications, configurations,... Free 25 users and 30 days history users.
- pyup.io — Monitor Python dependencies for security vulnerabilities and update them automatically. Free for one private project, unlimited projects for open source.
- qualys.com — Find web app vulnerabilities, audit for OWASP Risks
- reCAPTCHAMe — free reCAPTCHA and hCAPTCHA backend service. No Server-Side coding needed. Works for static websites.
- report-uri.io — CSP and HPKP violation reporting
- ringcaptcha.com — Tools to use phone number as id, available for free
- snyk.io — Can find and fix known security vulnerabilities in your open source dependencies. Unlimited tests and remediation for open source projects. Limited to 200 tests/month for your private projects.
- Sqreen — Application security monitoring and protection (RASP, WAF and more) for web applications and APIs. Free for 1 app and 3 million requests.
- ssllabs.com — Very deep analysis of the configuration of any SSL web server
- StackHawk Automate application scanning throughout your pipeline to find and fix security bugs before they hit production. Unlimited scans and environments for a single app.
- Sucuri SiteCheck - Free website security check and malware scanner

- Protectumus - Free website security check, site antivirus and server firewall (WAF) for PHP. Email notifications for registered users in free tier.
- TestTLS.com - Test a SSL/TLS service for secure server configuration, certificates, chains etc. Not limited to HTTPS.
- threatconnect.com — Threat intelligence: It is designed for individual researchers, analysts and organizations who are starting to learn about cyber threat intelligence. Free up to 3 Users
- tinfoilsecurity.com — Automated vulnerability scanning. Free plan allows weekly XSS scans
- Ubiq Security — Encrypt and decrypt data with 3 lines of code and automatic key management. Free for 1 application and up to 1,000,000 encryptions per month.
- Virgil Security — Tools and services for implementing end-to-end encryption, database protection, IoT security and more in your digital solution. Free for applications with up to 250 users.
- Virushee — Privacy-oriented file/data scanning powered by hybrid heuristic and AI-assisted engine. Possible to use internal dynamic sandbox analysis. Limited to 50MB per file upload

Management System

- bitnami.com — Deploy prepared apps on IaaS. Management of 1 AWS micro instance free
- Esper — MDM and MAM for Android Devices with DevOps. 100 devices free with 1 user license and 25 MB Application Storage.
- jamf.com — Device management for iPads, iPhones and Macs, 3 devices free
- Miradore — Device Management service. Stay up-to-date with your device fleet and secure an unlimited number of devices for free. Free plan offers basic features.
- moss.sh - Help developers deploy and manage their web apps and servers. Free up to 25 git deployments per month
- runcloud.io - Server management focusing mainly on PHP projects. Free for up to 1 server.
- ploi.io - Server management tool to easily manage and deploy your servers & sites. Free for 1 server.

Messaging

- Ably - Realtime messaging service with presence, persistence and guaranteed delivery. Free plan includes 3m messages per month, 100 peak connections and 100 peak channels.
- cloudamqp.com — RabbitMQ as a Service. Little Lemur plan: max 1 million messages/month, max 20 concurrent connections, max 100 queues, max 10,000 queued messages, multiple nodes in different AZ's
- connectycube.com - Unlimited chat messages, p2p voice & video calls, files attachments and push notifications. Free for apps up to 20K MAU.
- courier.com — Single API for push, in-app, email, chat, SMS, and other messaging channels with template management and other features. Free plan includes 10,000 messages/mo.
- pusher.com — Realtime messaging service. Free for up to 100 simultaneous connections and 200,000 messages/day
- scaledrone.com — Realtime messaging service. Free for up to 20 simultaneous connections and 100,000 events/day
- synadia.com — NATS.io as a service. Global, AWS, GCP, and Azure. Free forever with 4k msg size, 50 active connections and 5GB of data per month.
- cloudkarafka.com - Free Shared Kafka cluster, up to 5 topics, 10MB data per topic and 28 days of data retention.
- pubnub.com - Swift, Kotlin and React messaging at 1 million transactions each month. Transactions may contain multiple messages.

Log Management

- bugfender.com — Free up to 100k log lines/day with 24 hours retention
- humio.com — Free up to 2 GB/day with 7 days retention
- logdna.com - Free for a single user, no retention, unlimited hosts and sources
- logentries.com — Free up to 5 GB/month with 7 days retention
- loggly.com — Free for a single user, see the lite option
- logz.io — Free up to 3 GB/day, 3 days retention
- ManageEngine Log360 Cloud — Log Management service powered by Manage Engine. Free Plan offers 50 GB storage with 1 Month retention.
- papertrailapp.com — 48 hours search, 7 days archive, 100 MB/month
- sematext.com — Free up to 500 MB/day, 7 days retention
- sumologic.com — Free up to 500 MB/day, 7 days retention

Translation Management

- crowdin.com — Unlimited projects, unlimited strings and collaborators for Open Source
- lingohub.com — Free up to 3 users, always free for Open Source
- localazy.com - Free for 1000 source language strings, unlimited languages, unlimited contributors, startup and open source deals
- Localeum - Free up to 1000 strings, 1 user, unlimited languages, unlimited projects
- localizely.com — Free for Open Source
- Loco — Free up to 2000 translations, Unlimited translators, 10 languages/project, 1000 translatable assets/project
- oneskyapp.com — Limited free edition for up to 5 users, free for Open Source
- POEditor — Free up to 1000 strings
- SimpleLocalize - Free up to 100 translation keys, unlimited strings, unlimited languages, startup deals
- transifex.com — Free for Open Source
- Translation.io - Free for Open Source
- webtranslateit.com — Free up to 500 strings
- weblate.org — It's free for libre projects up to 10,000 string source for the free tier, and Unlimited Self-hosted on-premises.

Monitoring

- Pingmeter.com - 5 uptime monitors with 10 minutes interval. monitor SSH, HTTP, HTTPS, and any custom TCP ports.
- amixr.io - Developer-friendly alerting and on-call management with brilliant Slack Integration, API and Terraform. Free phone call, SMS, Telegram, Slack and E-Mail packages.
- appdynamics.com — Free for 24 hours metrics, application performance management agents limited to one Java, one .NET, one PHP and one Node.js
- appneta.com — Free with 1-hour data retention
- assertible.com — Automated API testing and monitoring. Free plans for teams and individuals.

- blackfire.io — Blackfire is the SaaS-delivered Application Performance Solution. Free Hacker plan (PHP only)
- checklyhq.com - Open source E2E / Synthetic monitoring and deep API monitoring for developers. Free plan with 5 users and 50k+ check runs.
- circonus.com — Free for 20 metrics
- cloudsploit.com — AWS security and configuration monitoring. Free: unlimited on-demand scans, unlimited users, unlimited stored accounts. Subscription: automated scanning, API access, etc.
- datadoghq.com — Free for up to 5 nodes
- deadmanssnitch.com — Monitoring for cron jobs. 1 free snitch (monitor), more if you refer others to sign up
- elastic.co — Instant performance insights for JS developers. Free with 24 hours data retention
- freeboard.io — Free for public projects. Dashboards for your Internet of Things (IoT) projects
- freshworks.com — Monitor 50 URLs at 1-minute interval with 10 Global locations and 5 Public status pages for Free
- gitential.com — Software Development Analytics platform. Free: unlimited public repositories, unlimited users, free trial for private repos. On-prem version available for enterprise.
- Grafana Cloud - Grafana Cloud is a composable observability platform, integrating metrics and logs with Grafana. Free: 3 users, 10 dashboards, 100 alerts, metrics storage in Prometheus and Graphite (10,000 series, 14 days retention), logs storage in Loki (50 GB of logs, 14 days retention)
- healthchecks.io — Monitor your cron jobs and background tasks. Free for up to 20 checks.
- inspector.dev - A complete Real-Time monitoring dashboard in less than one minute with free forever tier.
- instrumentalapp.com - Beautiful and easy-to-use application and server monitoring with up to 500 metrics and 3 hours of data visibility for free
- keychest.net/speedtest - Independent speed test and TLS handshake latency test against Digital Ocean
- letsmonitor.org - SSL monitoring, free for up to 5 monitors
- loader.io — Free load testing tools with limitations
- newrelic.com — New Relic observability platform built to help engineers create more perfect software. From monoliths to serverless, you can instrument everything, then analyze, troubleshoot, and optimize your entire software stack. Free tier offers 100GB/month of free data ingest, 1 free full access user, and unlimited free basic users.
- nixstats.com - Free for one server. E-Mail Notifications, public status page, 60 second interval and more.
- nodequery.com — Free basic server monitors up to 10 servers
- OnlineOrNot.com - 10 uptime monitors with a 5 minute interval, 1 page speed monitors with a 12 hour interval. Free alerts via Slack and Email.
- opsgenie.com — Powerful alerting and on-call management for operating always-on services. Free up to 5 users.
- paessler.com — Powerful infrastructure and network monitoring solution including alerting, strong visualization capabilities and basic reporting. Free up to 100 sensors.
- pagertree.com - Simple interface for alerting and on-call management. Free up to 5 users.
- pingbreak.com — Modern uptime monitoring service. Check unlimited URLs and get downtime notifications via Discord, Slack or email.
- pingpong.one — Advanced status page platform with monitoring. Free tier includes one public customizable status page with SSL subdomain. Pro plan is offered to open-source projects and non-profits free of charge.
- sematext.com — Free for 24 hours metrics, unlimited number of servers, 10 custom metrics, 500,000 custom metrics data points, unlimited dashboards, users, etc.

Search

- algolia.com — Hosted search-as-you-type (instant). Free hacker plan up to 10,000 documents and 100,000 operations. Bigger free plans available for community/Open Source projects
- bonsai.io — Free 1 GB memory and 1 GB storage
- searchly.com — Free 2 indices and 20 MB storage
- pagedart.com - AI search as a service the free tier includes 1000 Documents, 50000 searches. Larger free tiers are possible for worthwhile projects.

Email

- 10minutemail - Free, temporary email for testing.
- AnonAddy - Open-source anonymous email forwarding, create unlimited email aliases for free
- biz.mail.ru — 5,000 mailboxes with 25 GB each per custom domain with DNS hosting
- Bump - Free 10 Bump email addresses, 1 custom domain
- Burnermail – Free 5 Burner Email Addresses, 1 Mailbox, 7 day Mailbox History
- Buttondown — Newsletter service. Up to 1,000 subscribers free
- CloudMailin - Incoming email via HTTP POST and transactional outbound - 10,000 free emails/month
- cloudmersive.com — Email validation and verification API for developers, 2,000 free API requests/month

- Contact.do — Contact form in a link (bitly for contact forms) - totally free!
- debugmail.io — Easy to use testing mail server for developers
- elasticemail.com — 100 free emails/day. 1,000 emails for $0.09 through API (pay as you go).
- fakermail.com — Free, temporary email for testing with last 100 email accounts stored.
- forwardemail.net — Free email forwarding for custom domains. Create and forward an unlimited amount of email addresses with your domain name (**note**: You must pay if you use .casa, .cf, .click, .email, .fit, .ga, .gdn, .gq, .loan, .london, .men, .ml, .pl, .rest, .ru, .tk, .top, .work TLDs due to spam)
- ImprovMX – Free email forwarding
- inboxkitten.com - Free temporary/disposable email inbox, with up-to 3 day email auto-deletes. Open sourced, and can be self-hosted.
- inumbo.com — SMTP based spam filter, free for 10 users
- kickbox.io — Verify 100 emails free, real-time API available
- mail.tm — Disposable e-mail with user friendly interface. No registration needed.
- mailazy.com — Mailazy is the only simple transactional email service you'll need. 15,000 emails/month free forever (500 emails/day sending limit).
- mail-tester.com — Test if email's dns/spf/dkim/dmarc settings are correct, 20 free/month
- mailboxlayer.com — Email validation and verification JSON API for developers. 1,000 free API requests/month
- mailcatcher.me — Catches mail and serves it through a web interface
- mailchimp.com — 2,000 subscribers and 12,000 emails/month free
- MailerLite.com — 1,000 subscribers/month, 12,000 emails/month free
- mailinator.com — Free, public, email system where you can use any inbox you want
- mailjet.com — 6,000 emails/month free (200 emails daily sending limit)
- mailkitchen — Free for life without commitment, 10,000 emails/month, 1,000 emails/day
- Mailnesia - Free temporary/disposable email, which auto visit registration link.
- mailsac.com - Free API for temporary email testing, free public email hosting, outbound capture, email-to-slack/websocket/webhook (1,500 monthly API limit)
- Mailtie.com - Free Email Forwarding for Your Domain. No registration required. Free Forever.
- mailtrap.io — Fake SMTP server for development, free plan with 1 inbox, 50 messages, no team member, 2 emails/second, no forward rules
- mailvalidator.io - Verify 300 emails/month for free, real-time API with bulk processing available
- mail7.io — Free Temp Email Addresses for QA Developers. Create email addresses instantly using Web Interface or API
- mohmal.com — Disposable temporary email
- moosend.com — Mailing list management service. Free account for 6 months for startups
- Outlook.com - Free personal email and calendar
- pepipost.com — 30k emails free for first month, then first 100 emails/day free
- phplist.com — Hosted version allow 300 emails/month free
- postmarkapp.com - 100 emails/month free, unlimited DMARC weekly digests
- Sender Up to 15 000 emails/month - Up to 2 500 subscribers
- sendgrid.com — 100 emails/day and 2,000 contacts free
- sendinblue.com — 9,000 emails/month free
- sendpulse.com — 50 emails free/hour, first 12,000 emails/month free
- socketlabs.com - 40k emails free for first month, then first 2000 emails/month free
- sparkpost.com — First 500 emails/month free
- Substack — Unlimited free newsletter service. Start paying when you charge for it.
- Tempmailo - Unlimited free temp email addresses. Autoexpire in two days.

- temp-mail.io — Free disposable temporary email service with multiple emails at once and forwarding
- testmail.app - Automate end-to-end email tests with unlimited mailboxes and a GraphQL API. 100 emails/month free forever, unlimited free for open source.
- tinyletter.com — 5,000 subscribers/month free
- trashmail.com - Free disposable email addresses with forwarding and automatic address expiration
- Validator.Pizza — Free API to detect disposable emails
- Verifalia — Real-time email verification API with mailbox confirmation and disposable email address detector; 25 free email verifications/day.
- verimail.io — Bulk and API email verification service. 100 free verifications/month
- Yandex.Connect — Free email and DNS hosting for up to 1,000 users
- yopmail.fr — Disposable email addresses
- Zoho — Started as an e-mail provider but now provides a suite of services out of which some of them have free plans. List of services having free plans :
    - Email Free for 5 users. 5GB/user & 25 MB attachment limit, 1 domain.
    - Sprints Free for 5 users,5 Projects & 500MB storage.
    - Docs — Free for 5 users with 1 GB upload limit & 5GB storage. Zoho Office Suite (Writer,Sheets & Show) comes bundled with it.
